

## 14 Diamond Concrete Blades for Circular Saw

### 14inch concrete blades for circular saw from China diamond blades manufacturers

#### 1. Concrete blades introduction

Related Name: concrete blades, concrete saw blade, concrete diamond blade

Diameter: 14 inch or 350mm

Segment Height: 7mm,10 mm,12mm

Arbor size: 25.4mm ,50mm

Segment Quantity: 21 pcs per blade

Weld: Laser welded diamond blade

Packing: hard paper case and wooden box

#### 2. Concrete diamond blade application

Application options include wet or dry, widely used for cutting and processing natural stone, concrete, cement slabs, asphalt, refractory bricks, fiberboard, bricks and medium hard aggregate construction materials. Install it into circular saws, high-speed and masonry saws.

#### 3. Tips for using diamond concrete blade for circular saw

Wear proper safety gear.

Read the manual and make sure to follow the manufacturer's recommendation on specification of material to be cut and suitability for dry or wet cutting applications.

Before starting the cutting job, double check the [diamond saw blades](#) to see if there are any damages incurred during shipping or due to previous use.

During start-up or operation, do not stand in direct line with dry diamond or abrasive blades.

During operation, maintain a firm grip on hand-held saws.

Ensure that the machine is not dropped on the blade.

Be careful to avoid burns from the overheated segments or hot engine parts.

Different grades of diamond tool & diamond blade are designed and manufactured according to different market demands, ChinShine sales&marketing department II is in charge of the marketing & sales business towards Europe, America and other areas where high grade tools are needed .

Due to the specific focus on high-grade diamond tools, our department wouldn't accept low-grade products order and low-price OEM order. With the support of senior professors in local university, we have established a super hard material lab specializing in researches in diamond and all sorts of metal powder, keeping refining the diamond mixture to manufacture diamond segments. In addition, we are a member of the diamond saw blade association and the stone association where we have the opportunity to gain

acquaintance with the newest and the best diamond tools technique and stone from all over the world. Based on this advantage, ChinShine is striving to become the best cost-effect manufacturer of stone cutting tools and diamond tools.

By forceful technical support and scientific research, we have been experimenting new cutting materials and new diamond formula to lower the cost on the premise of high quality. As a member of the China(Xiamen) stone association, we have many opportunities to use diamond blades, diamond segments and other diamond grinding abrasive tools to test hundreds of stones from all over the world.

Various stones technical information provided by customers is also highly appreciated to help our researches.

Another advantage is that we are adept in producing special & complex tools including diamond saw blades and diamond segments which are applicable to concrete and stone industry. If you have special demands, Chinshine II is the best Choice.
