

1200mm(48inch)& 1600mm(64inch) diamond saw blades for granite  
marble

## **48/64 Diamond saw blades Introduction**

The common sizes of diamond multi-blade are 1000mm(40inch), 1200mm(48inch), 1400mm(56inch) and 1600mm(64inch), 1200mm and 1600mm are frequently used among these sizes. Chinshine uses high quality steel core blank to ensure recycling, balance&stability in cutting, little swing and low noise. The best diamond is used to make diamond segments, our engineers have developed hundreds of diamond segment formula to meet the demand of cutting different stone. The diamond segment can efficiently cut granite, marble, limestone, travertine, etc with fast speed, good sharpness and long lifespan. For these kind of blade, high frequency welding is used and no diamond segment will drop easily.

**Arbor Size:** 60mm,100mm,120mm, etc.

**Segment Size:**

**1200mm:** 24x8x10/12mm 80pcs per blade

**1600mm:**24x9.5x10/11/12mm 108 pcs per blade

Different sizes of diamond segment could be made for using in different stone cutting machine.

## **Notice of safe operation and maintenance for diamond multi-blades.**

Make a steady cut, don't apply pressure and force to your diamond blade during cutting.

Ensure that the diamond blades do not get too hot.

Don't adjust machine when it is running.

If the blades become blunt,cut brick or sandstone or abrasive wheel to re-sharpen.

Ensure that the machine is not dropped on the blade.

Be careful to avoid burns from the overheated segments or hot engine parts.

We can produce greater diamond blades like 2500mm and 3500mm, for any technique consultance and quotation, please email us at [sales@diamond-blade.org](mailto:sales@diamond-blade.org), we will answer you within 24 hours.

Different grades of diamond tool & diamond blade are designed and manufactured according to different market demands, ChinShine sales&marketing department II is in charge of the marketing & sales business towards Europe, America and other areas where high grade tools are needed .

Due to the specific focus on high-grade diamond tools, our department wouldn't accept low-grade products order and low-price OEM order. With the support of senior professors in local university, we have established a super hard material lab specializing in

researches in diamond and all sorts of metal powder, keeping refining the diamond mixture to manufacture diamond segments. In addition, we are a member of the diamond saw blade association and the stone association where we have the opportunity to gain acquaintance with the newest and the best diamond tools technique and stone from all over the world. Based on this advantage, ChinShine is striving to become the best cost-effect manufacturer of stone cutting tools and diamond tools.

By forceful technical support and scientific research, we have been experimenting new cutting materials and new diamond formula to lower the cost on the premise of high quality. As a member of the China(Xiamen) stone association, we have many opportunities to use diamond blades, diamond segments and other diamond grinding abrasive tools to test hundreds of stones from all over the world.

Various stones technical information provided by customers is also highly appreciated to help our researches.

Another advantage is that we are adept in producing special & complex tools including diamond saw blades and diamond segments which are applicable to concrete and stone industry. If you have special demands, Chinshine II is the best Choice.
