

350mm Laser Welded Diamond Blade, 14 Diamond Blade, Turbo

Concr

350mm laser welded diamond blade for cutting concrete, 14inch turbo diamond blade.

ChinShine quality **laser welded diamond saw blade**, use better quality blank saw blade and high grade formula in its segments. We adopt K7 Newly technology and AKYD laser welding with mature technique to weld the segments. Diamond blades by laser welded provides safe connection, safe cutting, heat-resistance, high speeding and good sharp, suitable for using without water.

Applications: Concrete, asphalt, wall, brick, refractory brick, masonry and so on.

For more laser welded diamond blades, please visit our concrete blade and asphalt blade.

Different grades of diamond tool & diamond blade are designed and manufactured according to different market demands, ChinShine sales&marketing department II is in charge of the marketing & sales business towards Europe, America and other areas where high grade tools are needed .

Due to the specific focus on high-grade diamond tools, our department wouldn't accept low-grade products order and low-price OEM order. With the support of senior professors in local university, we have established a super hard material lab specializing in researches in diamond and all sorts of metal powder, keeping refining the diamond mixture to manufacture diamond segments. In addition, we are a member of the diamond saw blade association and the stone association where we have the opportunity to gain

acquaintance with the newest and the best diamond tools technique and stone from all over the world. Based on this advantage, ChinShine is striving to become the best cost-effect manufacturer of stone cutting tools and diamond tools.

By forceful technical support and scientific research, we have been experimenting new cutting materials and new diamond formula to lower the cost on the premise of high quality. As a member of the China(Xiamen) stone association, we have many opportunities to use diamond blades, diamond segments and other diamond grinding abrasive tools to test hundreds of stones from all over the world.

Various stones technical information provided by customers is also highly appreciated to help our researches.

Another advantage is that we are adept in producing special & complex tools including diamond saw blades and diamond segments which are applicable to concrete and stone industry. If you have special demands, Chinshine II is the best Choice.
